Stilo

• In the FIA European Rally Championship, Miko Marczyk and Szymon Gospodarczyk claimed their first continental crown at the Croatia Rally

• In DTM, Ayhanca Güven (TUR) sealed the 2025 championship in spectacular fashion at Hockenheim, Sven Müller (GER) and Patric Niederhauser (CHE) were crowned Endurance Cup Champions with the Porsche 911 GT3 R (992) of Rutronik Racing, also taking third in the Overall standings

• Stilo celebrates its twentieth victory at the Dakar Rally: with Yazeed Al-Rajhi and Timo Gottschalk securing their first overall victory

• Stilo triumphs at Monte-Carlo: Ogier's historic 10th Monte-Carlo victory

• Rally Italia Sardegna crowns a historic weekend for Stilo: WRC, WRC2 and a new all-time record. Alongside co-driver Vincent Landais, Ogier conquered the challenging Sardinian stages at the wheel of his Toyota GR Yaris Rally1, claiming a fifth career win at Rally Italia Sardegna, more than any other driver in history. Moved all shell production (Carbon and Fiberglass) in-house with proprietary PURO TECHNOLOGY process: maximum lightness and performance

• Stilo claimed its second consecutive Rolex Daytona 24H triumph with the #7 Porsche 963 driven by Felipe Nasr and Laurens Vanthoor. In GTD Pro, Christopher Mies and Dennis Olsen took victory in the Ford Mustang GT3, Meanwhile, GTD saw Lars Kern lead the Corvette Z06 GT3.R to victory for AWA, with Ayhanca Guven (Porsche 911 GT3 R) and Mattia Drudi (Aston Martin Vantage GT3 Evo) completing the podium

• Stilo Introduces the new STILO DG20 App, a powerful and intuitive mobile application designed specifically for rally drivers

2024

- Dakar winner with Carlos Sainz 19th Dakar title
- Felipe Nasr wins Daytona Rolex 24H
- New Headquarter over 5000 mq engineering carbon/ composite prod. and the whole manufacturing in the same place
- Launch of the ST6 and VENTI4 range fully homologated FIA8859-2024 and FIA8860-2018
- Launch of the first ABP 8859 rated helmet in the world: ST6 Carbon ABP
- New full digital intercom: DG20
- Stilo becomes the exclusive distributor of Hans and Hybrid for Europe and Middle East
- Launch of the new HANS IV

2022

- Felipe Drugovich is Formula 2 Champion
- Nyck De Vries debuts in the FIA Formula 1 Championship with the Aston Martin F1 and adds up to Valtteri Bottas - Alfa Romeo ORLEN F1 Team and Lance Stroll - Aston Martin F1 Team
- 18th WRC title in a row with Kalle Rovanperä and Jonne Halttunen signing their 1th WRC title
- Official Team Supplier to TGR Motorsport in the WRC, winners of the WRC Dakar winners with Nasser Al-Attiyah and Mathieu Baumel

2019

- Stilo becomes Official Team Supplier to Mercedes-AMG Petronas Motorsport in the FIA Formula 1 Championship
- Stilo is Official Helmet Supplier to Porsche Motorsport
- 1st WRC title for Ott Tanak and Tommi Makinen. 15th in a row for Stilo
- Stilo is Hyundai Motorsport Racing Official Supplier
- Nyck De Vries is Formula 2 Champion
- New ST5 CMR with the extra-small shell for the karting range

2023

- 19th WRC title in a row with Kalle Rovanperä and Jonne Halttunen signing their 2th WRC title
- Launch New WRX, innovative helmet concept, offering the full-face protection and all the advantages of the open-face helmets
- 18th Dakar title with Nasser Al-Attiyah and Mathieu Baumel
- Official Team Supplier to Aston Martin F1
- Gabriel Bortoleto is FIA F3 Champion
- Christian Rasmussen wins INDY NXT title

2021

- Launch of the new Venti WRC open face helmet range
- 17th WRC title in a row with Ogier and Ingrassia signing their 8th title
- Nyck De Vries becomes World Champion winning Formula E
- Stilo presents the Wireless communication technology in rallying
- Stilo and Simpson join The Holley Group, listed in the NY stock exchange

2018

- ST5 Zero VB is the first FIA 8860-2018 certified helmet and Valtteri Bottas is the world first driver to wear a FIA 8860-2018 ABP helmet during the Spa GP
- WRC DES, ST5, ST5 ABP: the whole range updates to the new FIA 8860-2018 standard
- Filipe Albuquerque wins Daytona Rolex 24H

2020

- Stilo wins the 16th WRC title in a row with Ogier and Ingrassia celebrating the 7th WRC title

2017

- In Formula 1 with Valtteri Bottas Mercedes F1 Team and Jolyon Palmer Renault F1 Team
- Earl Bamber wins the 24h of Le Mans and the WEC title with Porsche LMP1
- 5th WRC title for Sébastien Ogier and the 13th title in row for Stilo

2016

- Stilo becomes part of the Simpson Group based in the US
- Romain Dumas wins the 24h of Le Mans and the WEC title with Porsche LMP1
- Jimmie Johnson won NASCAR Sprint Cup Series
- 4th WRC title won with Sébastien Ogier

2015

- Stilo debuts in F1
- Stilo wins the 24h of Le Mans with Porsche - LMP1

2014

- Birth of ST5, the benchmark in full-face helmets
- DG30, DG10 the world's first rally intercoms with noise digital active cancellation

2013

- Stilo develops the world first rally intercom that debuts with Volkswagen winning the World Rally Championship with Sébastien Ogier

2012

- Stilo into the Rally Legend: eight World Champion title won with Sébastien Loeb
- Stilo wins the GP2 main series with Davide Valsecchi

2011

- Stilo designs ST4 Zero and WRC DES Zero, world's lightest FIA 8860 certified helmets.
- Verbecom launch: the very first communication system for racing with Bluetooth technology

2010

- Launch of the WRC DES, world's first FIA8860-2004 certified open-face helmet
- Launch of the ST30-DES, world's first rally intercom with Bluetooth technology for mobile telephones connection

2009

- Stilo develops ST-30, the world's first intercom featuring 2 circuits, one in use and one for backup
- First World Touring Car Championship victory with Gabriele Tarquini

2008

- Birth of the ST4: Stilo professional helmet for racing

2005

- First World Rally Championship victory with Sébastien Loeb

2004

- Debut in the WRC with Gilles Panizzi
- First Dakar Rally victory with Stéphane Peterhansel

2003

- First company worldwide to create a Bluetooth intercom for motorbikes

2000

- Origin of the WRC, the world's first open-face helmet

1999

- Foundation

MADE IN ITALY

WHY STILO?

The name Stilo comes from the tool used in the Bronze Age to write, to imprint their first thoughts, their first ideas, their first concepts. In time the word “stilo” evolved in “style”, that is the way each person uses a stilo: your own style. And our style is that of making products that leave a mark, exactly like a stilo in our ancestors wax boards.

OUR PHILOSOPHY

Top functionality. Everything a driver needs must be standard feature: intercom, connections, earmuffs, drinking system, etc.

The engine at Stilo is fueled by the constant search for innovation through the highest technologies and a passion for motorsport. A helmet is part of the safety equipment to the driver and is meant to be as safe as possible in the first place but it can be something more: an element of performance.

Stilo helmets are designed, developed, prototyped, tested and produced in Italy with a KM O philosophy, **100% made in Italy.**

Starting from the driver's needs in the motorsport racing activities, Stilo **Research and Development** Department combines the **know-how** built from experience with the use of **aerodynamics materials** and the most **advanced technologies**, creating new projects and working to never stop evolving. Highly qualified personnel work in Stilo **internal laboratory** and our **carbon shop** to make prototypes, crash tests and pre-series production following strict procedures.

Each Stilo helmet is **fully hand-made** in Bergamo, starting from the shell and all the way down to the labelling of the helmet before shipping. Every step of the production procedures is prepared with the utmost care and strict **quality controls** are in place during the whole process. All of this to offer the safest helmets, with accessories, features and functionalities that make sure our products are a perfect fit for each seat.

VENTI4 TROPHY

NEW

100% Made in Italy
production process

Updated finishing with a modern
titanium-inspired dark grey color

Wide Size Range : Available from
54 to 64 cm

Fully compatible with Stilo's
DG intercom systems

Optimized weight and
performance. The new helmets
are significantly lighter

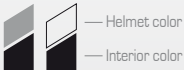

Both versions are supplied
with HANS posts as standard

PLUS

JET

100% Made in Italy

Appealing design with white shell and white peak

Both versions with Hans Posts Anchors

Excellent mix of price, quality, innovation and electronics

Stilo

Shell structure in MSF (multi Sandwich Fibers) with Kevlar reinforcements

Adjustable peak and short visor

Available in 2 versions with and without electronic kit

Compatible with wired WRC and DG Intercom

PLUS

JET

ST6R

Top Ventilation holes to reduce sweat and moisture

Integrated speakers with adjustable noise reduction earmuffs

Adjustable microphone

Full range now compatible with WIRELESS intercom

New size mix in 3 shells to fit the driver's head in the smaller and lighter shell possible

Short sunscreen visor available as an option

NEW CHEEK comfort padding designed for better fitting. Improved cheek stability

Increased downwards field of view (also compared to ST5)

WL-10 Wireless Intercom is the next step in rally intercom technology as connection, as the name describes, is now completely wireless with the crew's helmets. Based on the world's active digital noise-cancelling Stilo DG-10 intercom, the WL-10 Wireless has had a few more improvements making this the ultimate in motorsport communications and the worlds first wireless intercom for rallying. Design and functionalities have been fine-tuned, making this the best noise-cancelling intercom on the market. An additional extra is a wireless headset for use on-road sections.

Shaped to be perfectly integrated with the geometry of the helmet

To be plugged directly to the side port of the helmet

Power and volume controls

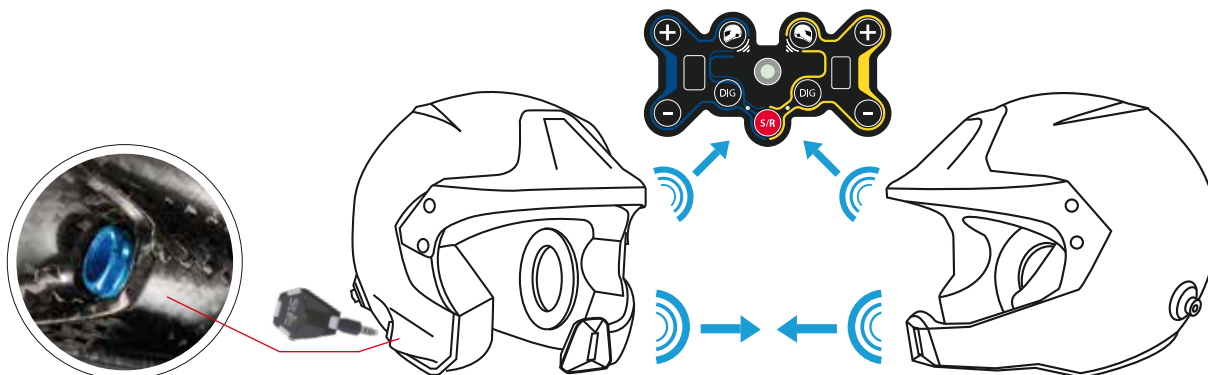

WL-KEY AG0001
WIRELESS

The Wireless helmet keys and headsets have their own battery which when fully charged has enough power to allow up to 5 hours of continuous talk time. Charging of these items is through a USB plug. These keys have been designed to plug directly into the Venti WRC, Venti Trophy Plus and ST5R WL helmets.

HOW IT WORKS

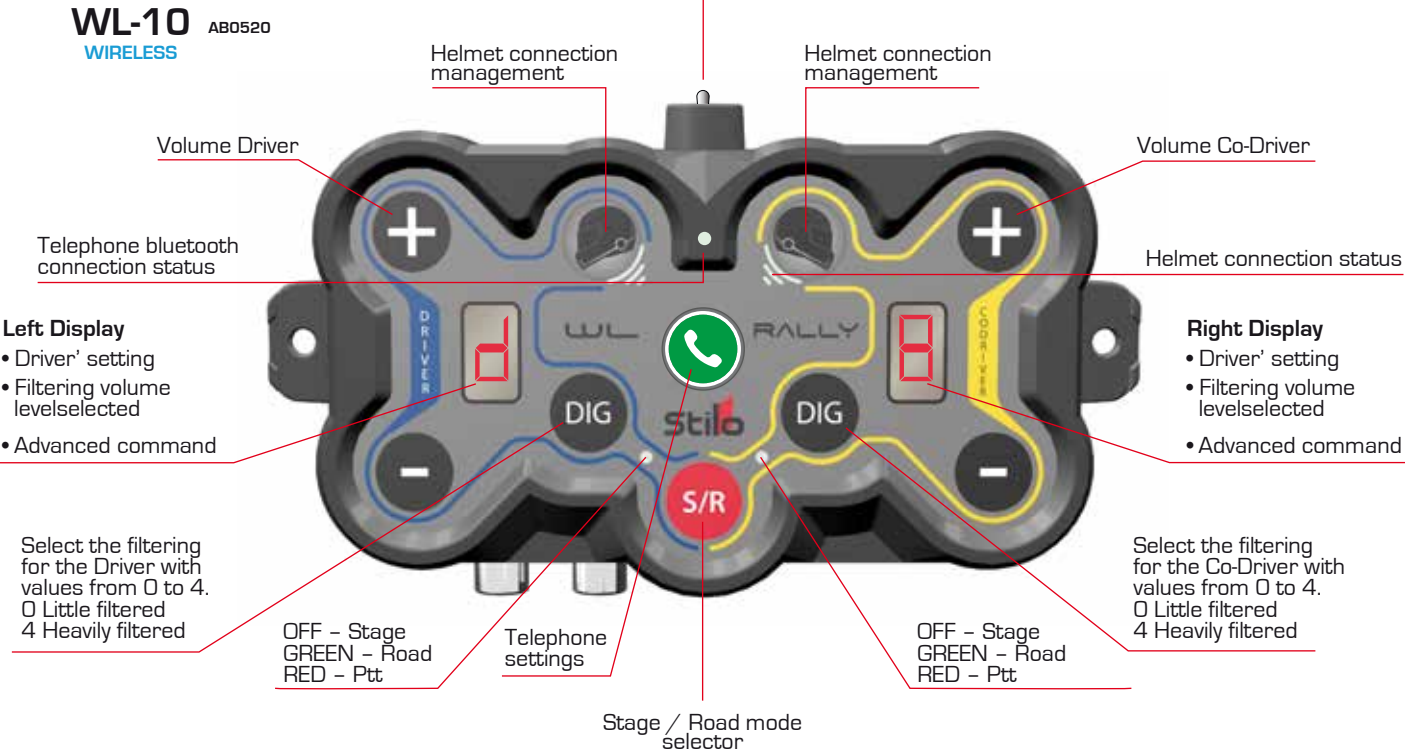

The helmet key is plugged into the helmet side port and paired with the intercom, allowing the connection to work up to a 10 metres distance, this allowing the crew to exit the car with their helmets on and still talk to each other. Powered from the car's 12 volt supply the biggest change in this intercom is the Wireless functionality allowing you to drop the connection cables with the crew's helmet.

- Keyboard with all the features of our DG-10 intercom
- No cables to the helmets

*On with green button

AQ0001
The bundle includes
1 WL-10 intercom (AB0520)
and 2 wireless helmet keys
WL-KEY (AQ0001)
paired and ready to use

AD0225
Wireless headsets
for use on-road sections

The WL-10 features 1 output for the crew's communications to a camera system and 1 input for a radio interface.

CG0020 Radio interface for for WL-10 - Universal
CG0021 Radio interface for for WL-10
Prepared for connections with radio cables (YD0202 to YD0211)
PTT cable YC0011 included

Stilo DG-30 EVO: the ultimate digital intercom for professionals

The DG-30 EVO, an evolution of the DG-30 (the world first digital intercom and winner of several world titles in the WRC championship) marks a significant improvement in the performances. The Active Digital Noise Cancelling EVO filters, with independent settings for driver and co-driver, allow an impeccable communication even in the most extreme conditions. Designed for professionals, the DG-30 EVO offers top level performances and advanced features, keeping the highest control and customization for a perfect communication. With the possibility of choosing between different noise cancelling modes and customized audio settings, the DG-30 EVO guarantees the highest quality in the communication. Equipped with an ergonomic remote control panel and with an analogical backup system, the DG-30 EVO offers professional level performances, always ready for any challenge.

DG-30 EVO

MAIN UNIT

REMOTE CONTROL PANEL

AB0606 DG - 30 EVO

Bluetooth Remote control panel and main unit.

AB0711 DG - 30 EVO PRO

All commercial-grade connectors, with Deutsch (military-grade). Available upon request.

- Active Digital Noise Cancelling EVO with real time elaboration
- Dual digital filter with independent settings for Driver and Co-Driver
- Integrated Bluetooth for mobile phone connection (audio link)
- Remote Control Panel: Easy-to-use ergonomic control panel designed for efficient system settings
- Control via CAN-BUS directly from the dashboard (with no need for the control panel)
- Two separate intercom circuits built inside the main unit, one main digital system and a spare analogue circuit that can instantly be activated with a simple switch.
- Adjustable voice pitch (EQ button) and separate noise cancelling modes (DIG button), to improve communication in cars with all noise levels
- Camera and radio connection

YB0600.2
Helmets connection cable (not included)

YB0317.2
45 cm (coil included)
Extension cable recommended for AB0200, AB0500, AB0214, AB0600

Stilo DG-20: the evolution of excellence in the noise cancellation

Based on the experience of DG-10, the most appreciated Stilo intercom in the market, the new DG-20 intercom represents a firm step forward in the performances. Thanks to a more powerful processor, the DG-20 intercom elaborates signals in real time, allowing the use of advanced algorithms for an even more performing digital noise cancelling. Thanks to the digital double filter elaboration with independent settings for driver and co-driver, the DG-20 intercom guarantees a crystal-clear, customized communication. An innovative mobile app allows an advanced, user-friendly setting, while the USB-C port integrates data connection and firmware upgrade, thus guaranteeing a performing, always updated intercom.

DG-20

- Digital active noise cancellation EVO with real time processing
- Dual digital filter with independent settings for Driver and Co-Driver
- Integrated Bluetooth for mobile phone connection (audio link)
- Stilo Mobile App available for intercom user-friendly configuration
- USB-C port for data connection and firmware upgrading
- New easy-to-use ergonomic control panel with a user-friendly interface
- Camera and radio connection

YY0030 Isolating Filter for DG-10 intercom [1 IN / 2 OUT RCA]

DG-20 RAID

Designed and developed to resist and maintain high performance in the extreme environments and intensive usage typical of X-Country, Raid and Dirt racing

- Digital active noise cancellation with sda filter
- Improved filters for an optimized noise cancellation
- Camera and radio connections
- Female helmet connection cables integrated
- Voice returns for both driver and co-driver can be adjusted

- The DG-20 Raid does not include Bluetooth, ensuring full compliance with off-road racing regulation
- The interface with the DG-20 app is through the USB-C port (available for Android only)
- The firmware upgrade is performed through the app via USB-C on Android platforms only
- Intercom compatible with all microphones supplied by Stilo (Magnetic Dynamic and Electret)

- **The use of AC0204.2 is required**

DG-20

DOWNLOAD OUR
NEW APP

STILO DG20 App is a powerful and intuitive mobile application designed specifically for rally drivers, available for download on Google Play and Apple Store. Developed by rally experts for rally experts, STILO DG20 App is the first app of its kind that allows users to fully manage, adjust, and fine-tune the intercom electronic settings directly from the smartphones.

- The App provides a step-by-step guide to all control unit functionalities, available directly on the user's smartphone. In addition to in-depth tutorials and instructions, each function is clearly explained with helpful tooltips, making configuration more intuitive.
- A key feature is the quick-access GENERAL CONFIGS section, which allows for faster and easier adjustment of important settings such as radio-in crucial for achieving optimal audio recordings. Users can also fine-tune the STILO DG20 lighting intensity, ensuring ideal visibility of the controls in a variety of lighting conditions and adapting to different stages and terrains.
- Users can now create and save custom and multiple configurations, allowing them to optimize performance based on their specific vehicle and crew setup. A major innovation is the introduction of "Voice vs Noise", Stilo's new advanced noise cancellation technology, delivering clearer audio and more precise voice detection even in challenging environments. Personal configurations can be saved to the smartphone and later reused on control units installed in other vehicles.
- Furthermore, the App now includes a built-in contact module, enabling direct communication with Stilo's support team. This feature opens the door for valuable user feedback and ongoing improvements based on real-user experience with the STILO DG20 system. The App is available on the Google Play and Apple Store.

WRC DES 9V

The best of Stilo's analogic noise cancellation available thanks to the "Extra Filter". Fed from the car power supply and 9V battery. Bluetooth connection with mobile telephones not available.

- The best analogic Stilo audio quality and the maximum ease of use at a price with no equal
- Camera or Radio connection
- Powered by a 9 volt battery or fed from the car power supply

Extra filter even more effective. Moving the switch to "Extra Filter" the background noises are strongly damped and the co-driver voice's louder to the driver. Since the driver's voice sounds lower to the co-driver, it is recommended that the Extra Filter is set to off during transfers.

AB0214

Camera OUT (low or high level) or radio IN switch

WRC 03

- Specifically designed for roll-bars fitment
- ON/OFF control with the co-driver plug-in
- Separated volumes, 9 V standard power supply and 12 V available option
- Camera connection

AB0200

AB0102

TROPHY 2

- Individual volume controls
- 9 Volt battery or 12 Volt optional adapter
- Camera connection

AIR SYSTEM KITS

The exclusive Stilo **Top Air System** takes fresh air to the driver's head and nose. The Top Air System can be fitted onto WRX, ST5 and ST6 Formula and GT models.

SHORT MODULAR TOP AIR KITS

YA0892MAG

Modular short top air for Venti WRC, WRX, ST5 and ST6 with integrated Maglock® adapter

YA0892A

Modular short top air for Venti WRC, WRX, ST5 and ST6 with main adapter. To be used with YA0895A or YA0896A

YA0896A

Modular straight fitting with Ø 32mm connection. Compatible with Maglock® connector

YA0895A

Modular 90° angled fitting with Ø 32mm connection. Compatible with Maglock® connector

SHORT TOP AIR KITS

YA0889

Top Air System for Venti WRC, WRX, ST5 and ST6 with oval connector

YA0897

Top Air System for Venti WRC, WRX, ST5 and ST6 with smaller round connector

MODULAR TOP AIR KITS

YA0893A small shell

For ST5 only on small shell. For ST6 for small and medium shell

YA0894A large shell

Modular top air for ST5 and ST6 with main adapter. To be used with YA0895A or YA0896A

YA0896A

Modular straight fitting with Ø 32mm connection. Compatible with Maglock® connector

YA0895A

Modular 90° angled fitting with Ø 32mm connection. Compatible with Maglock® connector

TOP AIR KITS

SIDE AIR KIT

YA0653

Integrated air coupling for Ø 20 mm tubes

YA0639

Coupling for YA0653 up to Ø 32 mm tubes

INTEGRATED DRINKING SYSTEM

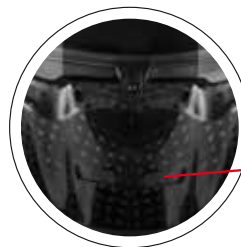

ST6/ST5 is homologated with a drinking system integrated. The silicon tube with bite valve is installed inside the helmet, where a dedicated housing channel in the cheek pads connects it to the shell plug and the female quick coupling installed on the outside.

- YA0600** Inner side of the helmet comprising
- YA0601** Bite valve in silicon rubber with anti-backflow system
 - YA0602** Water tube
 - YA0603** Male quick coupling
 - YA0600.B** same as **YA0600** with longer Water tube
- YA0605** Hydration bag comprising
- YA0604** Female quick coupling

FRONTAL DRINKING SYSTEM

ST6/ST5 are prepared for the frontal installation of the drinking system. Both left and right shell front grids can be opened for the tube to pass through and meet the dedicated passage in the internal chin pad.

RADIO CONNECTIONS

RADIO TO HELMET INTERFACE

Wired interface connecting the helmet to a car radio, comprising the interchangeable steering-wheel PTT button. Ready to be used with the radio connection wirings shown here below with part numbers YD0202 to YD0211.

RADIO WIRINGS

The CG0007 helmet interface and the universal track headsets CD0212 connects to the radios through the dedicated radio wirings. Available for the following models:

YD0202 similar to VERTEX Vx-160, Vx-180

YD0203 similar to KENWOOD TK-2140/2180/3140/3180

YD0204 similar to KENWOOD TK-2160/2170/2202/3160/3170/3201/3202

YD0205 similar to MOTOROLA GP300, MOTOROLA CP Series

YD0206 similar to MOTOROLA GP320/340/360/380

YD0207 similar to MOTOROLA GP328

YD0208 similar to MOTOROLA GM350

YD0209 similar to VERTEX Vx-2200

YD0210 Universal

YD0211 ICOM IC-F51

TRACK HEADSETS

Allowing communication with the car from the pit, these headsets come with adjustable earmuffs for noise reduction. Integrated PTT button, flexible micro-holder, noise cancelling microphone. Ready to be used with the radio connection wirings shown here above with part numbers YD0202 to YD0211.

CUSTOMIZED RADIO SYSTEMS

The radio kit is the basic configuration for the communication via radio between one car and the engineer at the box.

The driver will have one radio, the connection wirings to his helmet, a car antenna and the PTT button to decide when to start and stop the communications. The engineer instead will have a portable radio with antenna and belt clip, one headset with a noise cancelling microphone and the connection cable for the portable radio.

The communication can also be extended from one engineer to more people at the box.

Radio kits can be customized upon request to make them suite the Team's different needs.

Contact our customer service at info@stilo.it for enquiries.

CG0007

CD0212

CG0000CUST

VERBACOM CLUB

How it works

Verbacom offers drivers a cost effective and very efficient car to pit communication system by using mobile phones. The Pit wall phone calls the car phone before the car starts, the car unit is programmed to automatically answer and the phone call is kept open keeping the car and Pit unit continually connected until switched off. The communication between units is always open, the pit crew press the push to talk button on the headset to transmit to the driver, whilst the driver can simply speak without pressing any button thanks to the digital noise cancellation that cancels all background noises. If for any reason the signal is lost and call is dropped, the pit phone automatically calls the car which answers it for the driver. It is as easy as that.

Available versions

CQ0008

- 1 Car kit
- 1 Pit Single Headset

CQ0009

- 1 Car kit
- 1 Pit Single Headset
- 1 Pit Double Headset

CQ0010

- 2 Car kit
- 1 Double Headset

Car kit

The club unit is totally transportable for use in any vehicle or kart. The main Bluetooth unit CQ0010 is self-powered and connects to a mobile phone (not included) which is mounted in the car. This unit has volume controls and a visible system status light for the driver, and also an on/off switch. This weighing just 66 gr and measuring 74 x 47 x 15 mm it is extremely small and light.

Helmet wiring YB0307.2 with an extension cable connects into the driver's helmet (AE0300 and AE0315 are required should your helmet have no wiring).

CQ0010

YB0307.2

Pit wall kit

Noise reduction headsets are self powered and have either a single or double Bluetooth unit subject to the system you buy. CD0003 and CD0004 connect to a mobile phone (not included) by Bluetooth for communication with the car, or wirelessly to the second pit headset.

HOW TO MEASURE

To find the right size for your **HANS Device**, measure around your neck above your shirt collar using a soft tape measure, or use a ruler to determine your neck diameter in the same area. Keep in mind that sizing can sometimes overlap between different options, so personal comfort should ultimately guide your choice. If you're a youth racer, consider selecting a size that allows room to grow while still maintaining a safe and secure fit.

CARBON CURVA TEK 8870

Developed in full compliance with the latest international homologation standards, **Carbon Curva TEK** has been meticulously engineered with a focus on the crucial interaction between driver, seat, and protective device.

New straps in technical material for better comfort and reliability

Shaped chest section on the upper area to reduce the overall size and avoid interference with the helmet

Enhanced resistance in the area of flexion

Seamless external Carbon layer, to reduce the friction; matching the look of the new CMR LITE

Optimal flexibility thanks to Stilo innovative carbon/rubber technology

Seamless external carbon layer without rivets or Velcro, for a better comfort in the seat

ADVANCED STRUCTURE AND ERGONOMICS

Carbon Curva TEK is engineered to deliver outstanding protection, fully compliant with the **latest FIA 8870-2018 karting body protection standard**, while maintaining a dynamic, adaptive structure that moves with the athlete.

- **Carbon shell:** A new seamless external carbon layer reduces friction and enhances robustness, while preserving our innovative flexible carbon-rubber technology. This advanced construction improves ribs' conformity and reduces pressure points for superior comfort throughout racing.
- **Ergonomic chest plate:** The upper section of the chest plate now features a refined curved design that naturally follows the shape of the torso, improving fit and minimizing bulk across all sizes.

ENHANCED FUNCTIONAL SAFETY

The rib protector has been engineered to integrate seamlessly with the kart seat, improving stability and energy distribution during intense driving.

- **Optimized retention system:** Redesigned fastening straps eliminate metal rivets and Velcro on the sides and rear of the chest protector, enhancing seat compatibility and improving wear resistance.
- **Refined closure system:** The quick-release locking mechanism has been retained for maximum ease of use. The anchoring point has been moved to a central position to improve load distribution and ensure greater closure stability.

IMPROVED PADDING AND COMFORT

The Carbon Curva TEK adopts an internal padding to deliver excellent impact absorption and enhanced thermal comfort.

- **Shell-contact padding:** High-density memory foam bonded directly to the shell improves comfort and efficiently dissipates impact forces.
- **Chest-contact padding:** Ergonomically shaped comfort padding with integrated ventilation channels enhances airflow while managing heat and moisture during intense track sessions.

CARBON CURVA
TEK 8870

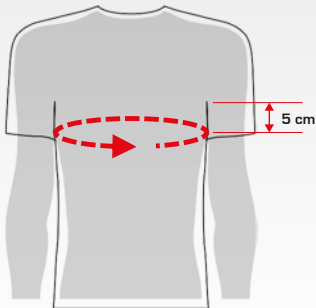

Homologated according to the FIA 8870-2018 (KARTING BODY PROTECTION) regulation. The device includes the 2 following components: Chest protection: it's the part of the device covering the frontal area of the chest of the user - Rib protection: it's the part of the device covering the rib area of the user.

HOW TO CHOOSE YOUR SIZE

To make sure the rib protector performs at best, it is crucial to choose the correct size (see chart below) and to wear it properly.

CARBON CURVA TEK 8870 SIZE CHART		
	DRIVER'S HEIGHT	RECOMMENDED CHEST CIRCUMFERENCE
AS0003XS	116 - 134 cm	58 - 68 cm
AS0003S	134 - 152 cm	62 - 72 cm
AS0003S+	134 - 152 cm	67 - 77 cm
AS0003M	152 - 170 cm	72 - 82 cm
AS0003L	170 - 188 cm	85 - 95 cm
AS0003L+	170 - 188 cm	90 - 100 cm
AS0003XL	170 - 188 cm	105 - 115 cm

HOW TO WEAR IT

To make sure the rib protector performs at best, it is crucial to choose the correct size (see chart below) and to wear it properly. The device needs to be worn under the suit and and, once the blocking system has been closed, the belts need to be fastened correctly and firmly (see the following images).

CARBON CURVA

These cutting edge protectors result in a flexible fit following and adapting to the drivers' body, protecting them from impacts without limiting movement or breathing.

Available in the following sizes:

- AS0001S small
- AS0001M medium
- AS0001L large
